The Secretary's Note

It is with immense pride and heartfelt gratitude that I present our Annual Report for FY 2024-25, marking the culmination of our 25-year journey of purposeful transformation. This milestone year witnessed the strategic restructuring of our operations to better align with our commitment to sustainable progress. With an expanded workforce and renewed vigor, we deepened our engagement with rural communities by advancing livelihood opportunities and implementing an integrated transitional development plan.

During the year, we strengthened our partnerships with reputed institutions and programs. We collaborated with CInI-TATA Trust for the Lakhpati Kisaan Smart Village initiative, contributed to the Jal Jeevan Mission to ensure safe drinking water for households, and continued our participation in the TDF WADI Project with NABARD. We also worked with the Ford Foundation through the Jiwi Daah Hasa watershed project, in association with BRLF and the Government of Jharkhand, to foster land-and-water regeneration and promote climate-resilient livelihoods across seven districts and more than 1,000 villages. Our association with HDFC Bank's Parivartan initiative under the Holistic Rural Development Program further enhanced our ability to create lasting community impact.

This year also marked new collaborations with ITC Ltd, Adani Foundation, and LIC, expanding the scope of our interventions and strengthening our ability to deliver inclusive rural transformation. We are equally delighted to share the launch of the Gram Seva Program funded by the SBI Foundation in Manika Block of Latehar District, reinforcing our mission of sustainable development. This journey would not have been possible without the exceptional teamwork, zeal, and integrity of our Support Team, stakeholders, and Funders/partners. Your dedication is the cornerstone of our impact, and we look forward to deepening these partnerships as we pursue a shared vision of a more equitable, empowered future.

(Dr. B.S. Gupta)

Our interventions span 11 districts across Jharkhand and Bihar, reaching 40 development blocks with impactful programs. In Jharkhand, our work covers Hazaribag, Ramgarh, West Singbhum, Bokaro, Giridih, Chatra, Koderma, Dumka, Simdega, and Khunti, while in Bihar we are active in Rohtas district. This extensive outreach reflects our commitment to driving inclusive growth, empowering communities, and building sustainable rural livelihoods at scale.

SUPPORT

Society for Upliftment of People with People's Organization & Rural Technology

Society for Upliftment of People with People's Organization and Rural Technology (SUPPORT) is a grassroots Non-profit, Non- Governmental organization working since 1998 in the state of Jharkhand, Bihar & West- Bengal. It was established by a group of experienced social workers associated with the purpose of empowering the community, especially women, children, youths, adolescent girls, marginal farmers, PVTGs, and minorities.

The core areas of interventions include livelihoods enhancement, quality education, skill development and health care support. The mission of SUPPORT is to organize and empower the marginalized sections of society through self-reliant initiatives and to enable them to conduct their own economic, social, educational and political affairs in an ethical and sustainable manner. SUPPORT collectivizes women from poor and marginalized groups into community institutions like SHGs and Federations.

Since its inception, the organization has promoted more than 10,000 SHG supporting more than 1.5 lakhs members.

ADVISORY BOARD

1. **Sister Rosily, Directress**

INTRODUCTION

VISION

Establishment of an educated, egalitarian, and socially just society based on the values of equality, fraternity and mutual help.

MISSION

The mission of SUPPORT are to organize and empower the marginalized section of the society, through Self Help initiative and enable them to manage their economic, social, and educational affairs in an ethical and sustainable manner.

OBJECTIVES

To empower the people by creating awareness among them and develop a spirit of confidence & selfhelp through people's organization.

To enable people to become self-reliant, socially, and economically, by maximum Integration of their knowledge, Skill, and optimum utilization oavailable resources.

Promotion of sustainable development activity through integral approach by ensuring the community and CBOS.

Development of the potentials and capabilities of the marginalized section and endeavors to work with them for realizing and optimally utilizing their potential for holistic development.

EDUCATION

SUPPORT PUBLIC SCHOOL (SPS)

SUPPORT Public School is the first affiliated school from CBSE, New Delhi at Mandu Ramgarh, Jharkhand. This school was established in 2018 by our honorable chairman Dr. Bhawani Shankar Gupta. Located in a remote village at Mandu, Ramgarh, Hazaribagh, SUPPORT Public School provides access to quality education for children from marginalized and underprivileged families. It serves as a lifeline for students from remote habitations who otherwise face barriers to learning.

Classes from Nursery to X, Total enrollment- (Girls: 188, Boys: 344).

CBSE-based curriculum with play-way methods in early years; focus on holistic child development through academics, sports, cultural programs, and co-curricular activities like drawing, dance, debate, yoga, quiz, and traditional games.

Regular celebration of national days (Independence Day, Republic Day, Teachers' Day, Children's Day) with active participation of teachers, students, and community members.

Special emphasis on inclusive education, ensuring equal opportunities irrespective of social or economic background.

Facilities include safe drinking water, playground space, basic library resources, and dedicated teachers motivated to nurture children as future-ready citizens.

The school acts as a beacon of hope for the region by bridging educational gaps and empowering children with knowledge, skills, and confidence to thrive in the 21st century.

LIC SATHI - Empowering Rural Education through Digital Classroom

- Under the SATHI project, LIC HFL supported the installation of 14 Smart Classrooms across government schools in Mandu, Gola, and Dulmi blocks.
- These interventions served as a turning point for over 1,550 students, fostering curiosity and enthusiasm through digital learning tools.
- The project went beyond installation—it focused on strengthening institutional structures by training teachers, mobilizing School Management Committees, and involving parents. As a result, schools recorded a 15% rise in student attendance, improved learning outcomes, and a visible shift in classroom culture. Digital content brought lessons to life, making learning both interactive and inclusive.
- This coordinated effort marked a district-wide digital transformation, equipping students with future-ready skills and reimagining rural education.

Case study

UMS Upper Khakhra, Ramgarh – A Model of Smart Learning

In the tribal village of Upper Khakhra, located in Ramgarh district, government school UMS Upper Khakhra was grappling with low student attendance, limited teacher availability, and minimal parental involvement. With support from LIC HFL under the SATHI project, a Smart Classroom was established, significantly transforming the teaching-learning process.

Following capacity-building workshops for the School Management Committee (SMC) and awareness sessions for parents and students, the school witnessed 100% student attendance and increased community ownership. Digital tools enhanced student engagement, reduced dropout rates, and filled teacher gaps. The initiative also emphasized health and hygiene (WASH), gender inclusion, and sustainability.

Today, the school stands as a successful example of digital inclusion in a remote region.

SOCIO- ECONOMIC & LIVELIHOOD DEVELOPMENT

Holistic Rural Development Program

SUPPORT, in collaboration with HDFC Bank, is implementing a three-year Holistic Rural Development Program (HRDP) in (P0450) Chandwara block, Koderma district(2021-2024), & (P1010)Pathalgadda block,Chatra district (Ongoing), Jharkhand. Focused on 15 villages, the program prioritizes Water Resource Development, Soil Erosion Prevention, Agriculture, Training, Capacity Building, Awareness Campaigns, Institutional Development, Animal Husbandry, and Infrastructure.

Its aim, from October 2021 to September 2024, is to empower around 3000 marginalized women farmers by creating sustainable livelihoods. It emphasizes Natural Resource Management techniques, encourages new agricultural practices, advocates health and sanitation, and fosters income opportunities for women and youth. Livestock management is also integrated to enhance income generation and socio economic development.

Key Achievements :

- Wells Constructed – 20
- Ensured access to safe water sources for irrigation and drinking purposes.
- Ponds Created – 16
- Improved water storage for agriculture and livestock use.
- Farmers Field Schools (FFS) – 20
- Farmers trained in modern and sustainable agricultural practices.
- Smart Schools Established – 14
- Strengthened digital learning facilities for rural children.
- Community Health Centres (CHC) – 20
- Improved access to basic healthcare at the village level.

CASE STUDY

Cultivating Change through Farmer Field School

Beneficiary: Champa Aajeevika Sakhi Mandal
Location: Chaurahi Village, Chandwara Block, Koderma
To address low farm productivity and limited access to modern practices, SUPPORT and HDFC Bank's Parivartan initiative introduced the Farmer Field School (FFS) model, benefiting over 150 farmers. Through training in advanced techniques like NADEP composting, mulching, and soilless nurseries, farmers increased cropping cycles from two to three annually and began earning ₹40,000–₹60,000 per cycle. The SHG now serves as a model in the region, promoting sustainable agriculture and inspiring others to adopt scientific methods.

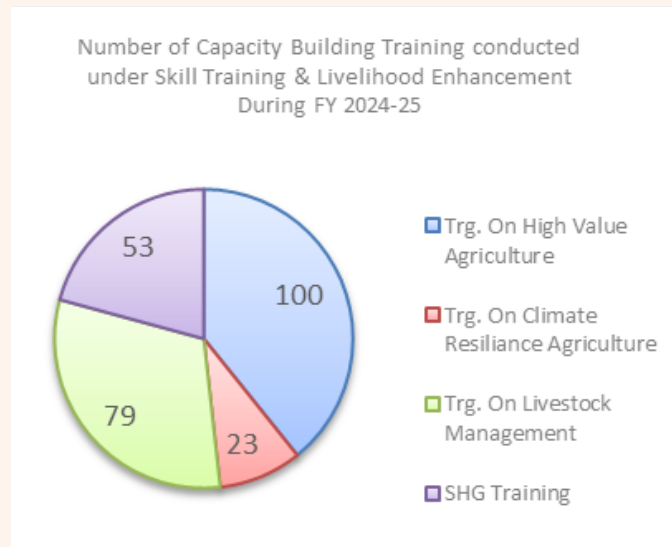

Empowered by Goats, Led by Women"

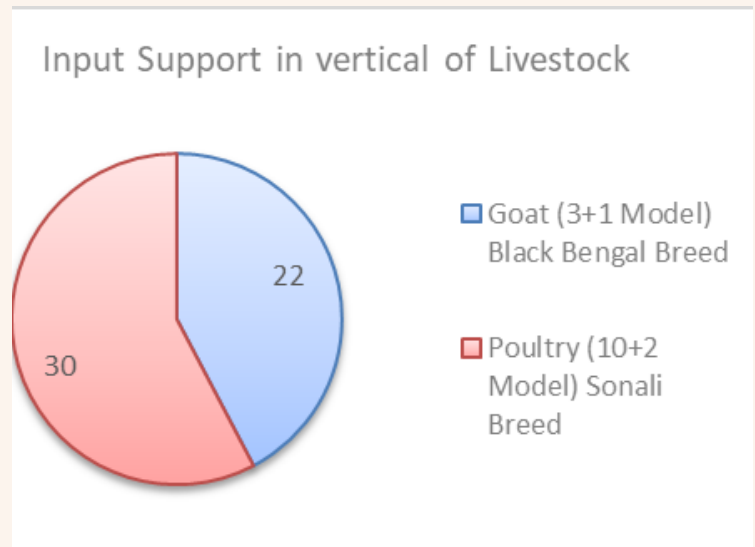

"Beneficiary: Laxmi Aajeevika Sakhi Manda
Location- Village – Bhondo, Block–Chandwara, District–Koderma
Laxmi Aajeevika Sakhi Mandal from Bhondo village, Chandwara block, Koderma, embraced goat rearing as a sustainable livelihood option through support from HDFC Bank's Parivartan-led HRDP, implemented by SUPPORT. Earlier, due to lack of proper shelter and exposure to cold and rain, goats suffered from diseases and animal attacks, leading to high mortality. Through the introduction of three Goat Mother Units (10+2 model of Black Bengal goats), along with training and improved practices, the group now manages 20 goats and earns an additional income of ₹1–2 lakh annually. This income has helped improve their children's education and overall family wellbeing. The initiative has positively impacted over 50–60 households, inspiring more women to participate in similar livelihood activities, thereby strengthening the rural economy and women's collective efforts.

Annual Impact (FY-2024-25)
Graph to summarize the events/activities:-

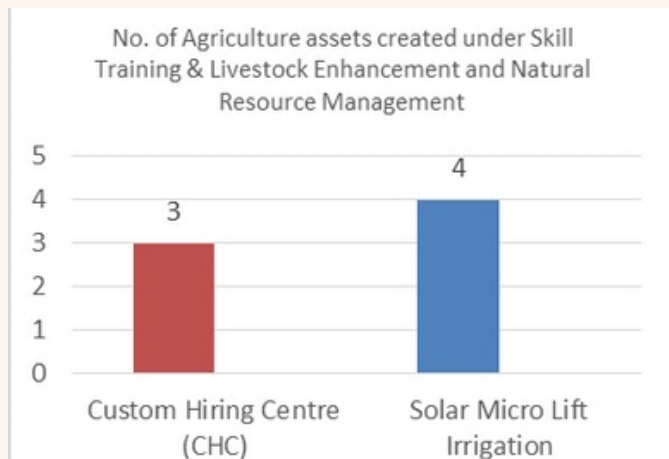

Capacity Building under Skills Training and Livelihood enhancement

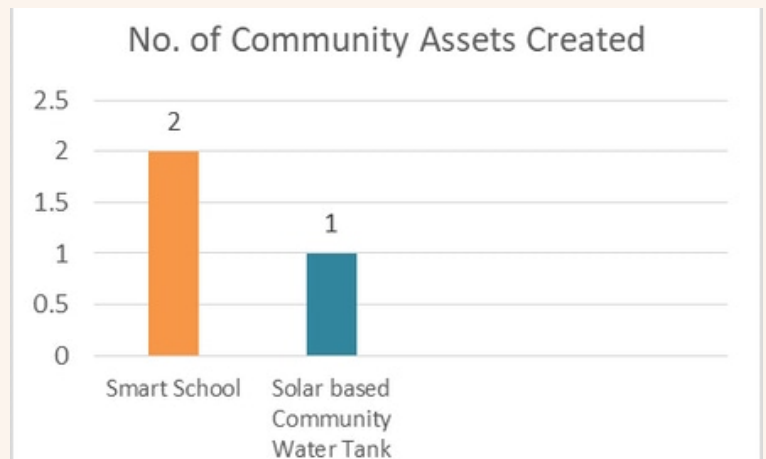

**Input Support under Skills Training and Livelihood Enhancement
(Input Support of Goatary and Poultry)**

Agriculture Assets created under Skills Training & livelihood enhancement and Natural Resource Management

Community Assets created under Health and Hygiene and Education intervention

FOOD & NUTRITION SECURITY WITH INCOME ENHANCEMENT PROJECT (FNSIE)

- The project aims to achieve food and nutrition security and generate significant income for women farmers in the target areas. The project also aims to empower these women so they can make their own decisions regarding agriculture and other household matters.
- Coverage: The project is being implemented in the Mandu and Dadi Blocks of the Ramgarh and Hazaribagh districts of Jharkhand. The report does not specify the exact number of villages covered.

Key Achievements :

- **Training & Capacity Building** – Trainings for staff, cadres, and farmers on nutrition, crops, and livestock.
- **Agriculture** – 2,435 nutrition gardens, modern crop techniques, and diverse crop cultivation.
- **Livestock** – 1,200 BYP and 659 goat vaccinations reducing animal mortality.
- **Irrigation** – 2 Solar Micro Lift Irrigation units installed for production clusters.
- **Programmatic Changes** – Introduced nano orchards and increased BYP herd size from 5 to 12 chicks

Case Study

Advancing Rural Livelihoods

In Karidih, Mandu Block, severe water scarcity once restricted farming to just two households. In 2024, the project, with community participation, installed a Solar Lift Irrigation system benefiting 29 farmers. This intervention, coupled with regular training on improved agricultural practices, enabled farmers like Rajni Devi to diversify from seasonal paddy cultivation to year-round vegetable and pulse farming. Rajni earned ₹9,800 from pea and bean sales, while also producing potatoes, onions, brinjal, cauliflower, chilli, and tomatoes for household consumption. Inspired by her success, she developed a nano orchard with fruit trees and ridge gourd plants, a model later adopted by 18 other farmers.

In Rabodh, Dadi Block, 50 dismil of Dolly Devi's land remained underutilized due to lack of awareness of advanced farming techniques. After receiving hands-on training in multilayer vegetable cultivation, backyard poultry, and goat rearing, she established a trellis system for vegetable production, earning ₹50,000 from sales. Additionally, she generated ₹48,000 from poultry and ₹6,000 from goat sales, raising her annual income from ₹20,000 to ₹1,04,000. These cases illustrate how targeted infrastructure, skill-building, and diversified livelihood opportunities can transform rural economies, improve food security, and inspire community-wide adoption of sustainable practices.

JHARKHAND JAL CHHAJAN YOJANA (JJY)

- The Jharkhand Jal Chhajan Yojana (JJY) aims to create resilient rural communities by improving water resource management and promoting sustainable agriculture. The project focuses on increasing water availability through the construction of ponds and check dams and empowers local residents with training in water conservation and agricultural productivity.
- Enhancing groundwater levels and overall water resource management in rural Jharkhand.
- Promoting agricultural practices that are sustainable and water-efficient.
- Increasing water availability for irrigation and domestic use through the construction of ponds, check dams, and bunding systems.
- Empowering local communities with training programs on livelihood enhancement, agricultural productivity, and water conservation.
- Building resilient rural communities that can effectively manage their water resources for long-term sustainability and an improved quality of life.

Lakhpati kisaan Program 2.0

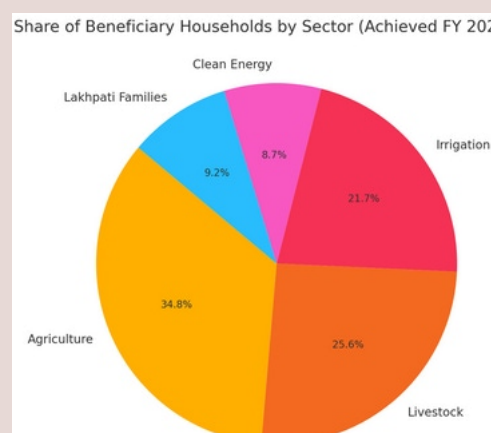

- The collaborative program between Tata Trusts and Cini successfully advanced climate-smart agriculture, diversified livelihoods, and women's economic empowerment across the Churchu and Dadi blocks.
- A total of 7,651 households benefited directly from the program's agricultural initiatives. This included the cultivation of high-value crops on 2,231 acres, with the adoption of modern technologies such as drip and mulching, protective cultivation, and comprehensive soil testing to improve yields and sustainability.
- The program by Tata Trusts and Cini advanced climate-smart agriculture, diversified livelihoods, and women's economic empowerment in Churchu and Dadi blocks.
- 7,651 households benefited from high-value crop cultivation on 2,231 acres, using technologies like drip and mulching.
- The Churchu Nari Urja FPC mobilized 822 shareholders, achieving a ₹3.59 crore turnover.
- Livestock development reached 5,644 households with deworming and vaccinations.
- 809 households were engaged in lac-based livelihoods.
- Water security improved through 7 seepage wells and drip irrigation on 8.2 acres.
- 1,912 households adopted clean energy, specifically solar irrigation.
- Key challenges included climate extremes, water scarcity, and market volatility.
- The future focus will be on drought-resistant crops, micro-irrigation, and stronger market linkages.

Lakhpati Kisan 2.0 (FY 2024-25)

Share of Beneficiary Households by Sector

TDF WADI PROJECT

- Building on Tribal Development Program, NABARD launched a nationwide initiative to replicate small orchards (1–2 acres) through the Tribal Development Fund (TDF).
- NABARD in collaboration with SUPPORT implemented a tribal development program for enhancing livelihoods through small orchards and integrating non-orchard activities like animal husbandry, sericulture, and NTFP for landless tribal families.
- The objective of this fund is to create replicable models of integrated development of tribal families on a participatory basis, through the adoption of sustainable income generating activities and to build & strengthen tribal institutions which enable mainstreaming of the communities by improving their socio-economic status.

T

RAISING SEMIALATA PLANTATIONS FOR LAC CULTIVATION

Project Area: Churchu & Dari Blocks in Hazaribagh

District, Jharkhand

Type of Beneficiaries: ST

Project Duration: 5 Years

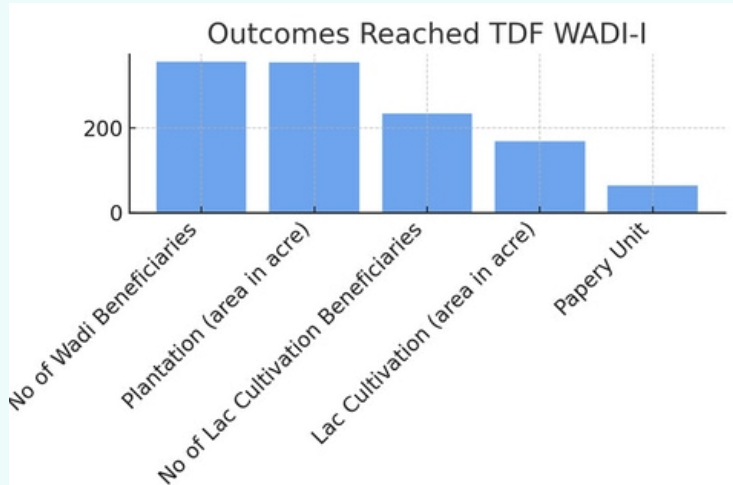

In FY2022, NABARD approved two projects in Jharkhand under its Tribal Development Fund (TDF) to establish semialata plantations on half-acre plots for lac insect cultivation. These projects aim to provide income and livelihood opportunities to 1,000 tribal families while also benefiting landless communities.

Unlike traditional lac cultivation that offers a seasonal and small-based livelihood that leverages the indigenous knowledge of tribal populations. The project adopted a 5-year project period, the time horizon seeks to strengthen the entire lac value chain from processing and value addition, enhanced market access (including exports), and reduce farmers' dependency on middlemen.

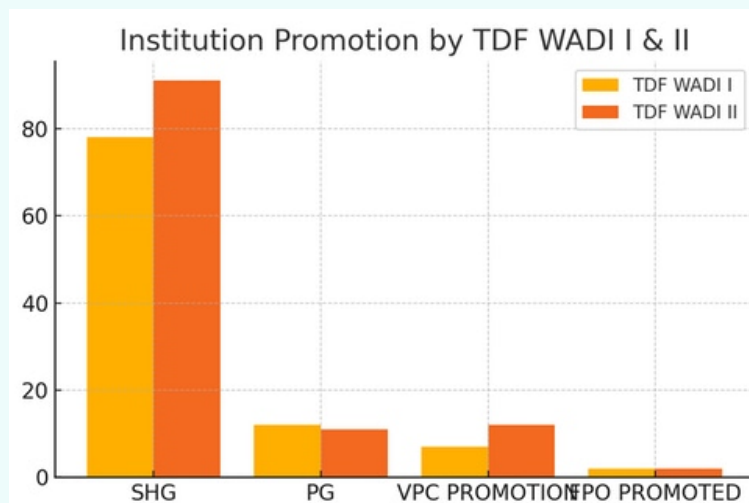

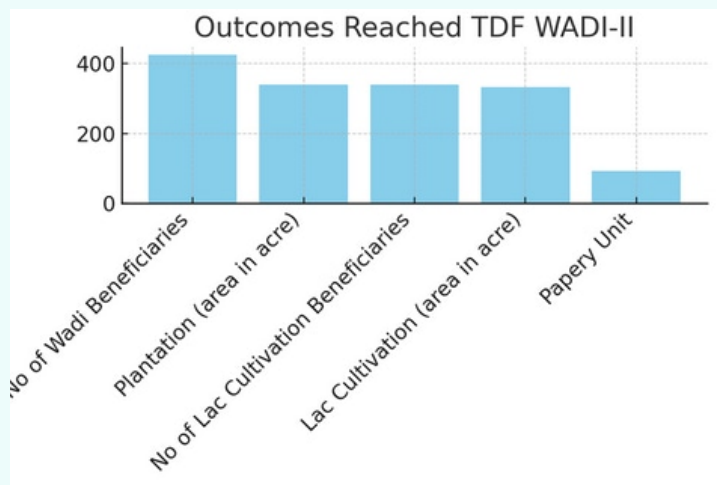

The initial funding covers plantation setup, related costs, and operational expenses for two years. This is being implemented based on a technical and agronomic collaboration with the Indian Institute of Natural Resins and Gum (IINRG) in Ranchi.

The projects are being implemented by SUPPORT in the Churchu and Dari blocks of Hazaribagh District

Common Ground Initiative

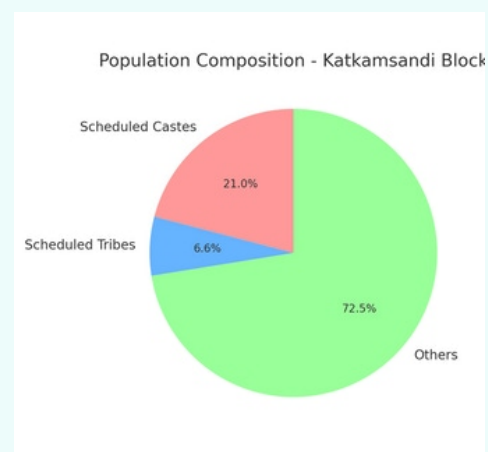

The Common Ground initiative strengthens community-led governance and sustainable resource management in Hazaribagh district. Through Multi-Actor Platforms (MAPs), it unites local leaders, government, and marginalized groups—especially women and tribes—for collective decision-making. Grassroots catalysts drive action on livelihoods, infrastructure, and commons restoration, leading to visible changes such as better roads, water access, and increased incomes from agriculture and forest produce.

Literacy Rates by Gender – Katkamsandi Block

Population Composition

CASE STUDY

In Parewatar village of Katkamsandi block, Hazaribagh district, the absence of a proper road had long hindered smooth movement. The existing kuchcha road was in extremely poor condition, causing inconvenience to the villagers. Recognizing the need for action, Sunita Devi, the Catalyst of Common Ground, convened a village meeting and encouraged residents to contribute voluntary labor for its repair. Inspired by the appeal, the community came together and successfully repaired the 5-kilometer stretch through collective effort. As a result, the road is now in good condition, significantly improving accessibility. Villagers have expressed great satisfaction and heartfelt gratitude to the SUPPORT organization and Sunita Devi for initiating this effort. The success story has become a talking point in neighboring villages, inspiring others towards similar community-led initiatives.

Birhor Student Felicitated for Academic Excellence

Rohit Birhor, son of Suresh Birhor from Jamdiha village in Churchu block, has made his community proud by securing first division in the 10+2 examination. Coming from a family struggling with poverty, his father received support from the organization through livestock and horticulture programs, which helped improve their livelihood. Alongside this, Rohit was provided with educational support and constant encouragement by Common Ground Catalyst Manoj Tudu. With dedication and hard work, Rohit achieved this milestone and now aspires to become an administrative officer in the Jharkhand government. His success not only reflects his perseverance but also stands as a motivating example for other children in the Birhor community.

Community-Led Road Repair in Parewatari Village

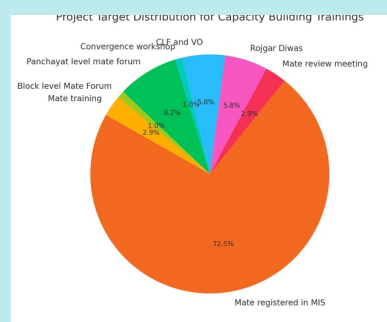

In Parewatari village of Katkamsandi block, Hazaribagh district, the absence of a proper road had long hindered smooth movement. The existing kuchcha road was in extremely poor condition, causing inconvenience to the villagers. Recognizing the need for action, Sunita Devi, the Catalyst of Common Ground, convened a village meeting and encouraged residents to contribute voluntary labor for its repair. Inspired by the appeal, the community came together and successfully repaired the 5-kilometer stretch through collective effort. As a result, the road is now in good condition, significantly improving accessibility. Villagers have expressed great satisfaction and heartfelt gratitude to the SUPPORT organization and Sunita Devi for initiating this effort. The success story has become a talking point in neighboring villages, inspiring others towards similar community-led initiatives.

Mega Watershed Program JIWI DA HASA

This initiative rejuvenates ecosystems and livelihoods in marginalized areas of Jharkhand by empowering Gram Panchayats to effectively use MGNREGA for watershed-based rejuvenation. It aims to double incomes, enhance production, and restore ecology by merging wage entitlements with other schemes. Strengthening community and Gram Panchayat capabilities boosts climate resilience and fosters economic growth. The core strategy leverages MGNREGA, Jharkhand Government programs, and local resources for sustainable development.

Trainings on Capacity building

Case Study Community-Led Planning through Commons Connect – Insights from FES, Odisha

- Community-Led Planning through Commons Connect – Insights from FES, Odisha
- In Odisha, the Foundation for Ecological Security (FES) is driving inclusive natural resource management by empowering communities to take ownership of their commons—forests, water bodies, and pastures.
- A robust approach rooted in community consultation and scientific planning has been implemented in Nakchi Panchayat of Kishorenagar Block, Angul, using the Commons Connect platform.
- Trained Panchayat Resource Persons (PRPs) and Community Resource Persons (CRPs) facilitated participatory resource mapping across five villages. This process gave visibility to water resource distribution, especially highlighting caste-based access disparities, and sparked discussions on equity and sustainability.
- Through this dialogue, communities and FES collaboratively identified feasible interventions for water harvesting, recharge structures, and livelihood activities, aligning with MGNREGA provisions. Scientific data—such as rainfall, land slope, well depths, and evapotranspiration—sourced through CLART was used to determine the most suitable structures at the micro-watershed level.
- Once finalized, these interventions were digitally mapped to generate a Preliminary DPR (Detailed Project Report) via Commons Connect. Community validation ensured ground-level relevance, after which the final DPR was presented to the Sarpanch and PRI members. This spurred not only approval but proactive planning, as Panchayat leadership committed to integrating the DPR into the Gram Panchayat Development Plan (GPDP).
- This initiative demonstrates how technology and grassroots participation can converge to ensure equitable, science-based, and community-owned planning, strengthening local institutions and promoting sustainable development of the commons.
